2007 Cellular (Wireless) Site Equipment Personal Property Report

INSTRUCTIONS: Use this form to report all of the tangible personal property and site improvements owned and/or used by your business at the location indicated below. Part A includes equipment that supports the telecommunication function and that would otherwise be reported on Form L-4175. Part B includes cellular telecommunication antennas, transmitting and receiving equipment and electronic and optical switching and routing equipment. Part C includes the communication tower and site improvements you have installed or are using at the location indicated below. Each location must be reported on a separate copy of this form. **Do not report** the costs of property or improvements on Form L-4175 that are reported on this form. You must, however, carry the Taxpayer Grand Total Cost to line 16 of the Summary and Certification Section on Form L-4175). All costs must be placed in the first column of appropriate table, adjacent to the appropriate acquisition year. The reported costs must reflect acquisition cost new as defined in form L-4175. See the instructions to form L-4175 and to STC Bulletins 1 of 1999 and 3 of 2000 for further guidance.

| Business Name | Assessment Roll Parcel Code Number | | | | | |
